1. Attached is photographic technical report H60, dated 30 June, entitled "Beschreibung und Betriebsvorschriften des Steuerschranks zur HGU Versuchsanlage Wechselrichterseite" written by Dipl. Ing. Filberich, Dipl. Ing. Hölters, Dr. Ing. Schiele, and Ing. Heinrich. This report was written at the request of the Bureau at Klingenberg which comes under the Scientific-Technical Department of the Ministry for Power Plants (NTO/MES code No. 43/20) located at Berlin-Rummelsburg, Hauptstrasse 9-13.
2. The story of how this report came to be written illustrates sharply the lack of cooperation between the various Russian technical bureaus. The Bureau at Klingenberg was apparently interested in a new development of a control desk (Steuersschrank) and Capt. Grois, acting chief of the Bureau Klingenberg approached Butayev, Soviet chief of the Rectifier Bureau for the purpose of having some of the technicians of the Rectifier Bureau write a technical report about the new control desk. Butayev refused flatly at first explaining that the work of the Rectifier Bureau on its control desk had been completed and that his technicians were too busy to engage in a new project. He finally compromised and asked the technicians whether they would be willing to do the job in their spare time which they consented to do. However, their extra hours will be paid by Klingenberg.
3. This report is sent to you for retention.
